

ABOUT YOUR INTERNET

Please be Advised: We are NOT responsible for your Internet service or equipment, therefore any Internet related issues can only be resolved by your Internet service provider. If you are experiencing streaming issues we recommend you contact your internet provider to test first your actual download speed and then your Wi-Fi signal. strength. It is highly recommended to have wired ETHERNET connection as Wi-Fi is not always stable.

If you are receiving repeated errors or continue to have buffering & cache full messages on multiple streams or several different titles you are trying to view, the issue is NOT your ULTRA BOXX Device!

TV PLUS & WETEK devices require a stable Internet connection! If your Internet service, equipment or the positioning of your wireless router does not meet the minimum requirements you will experience repeated errors, buffering & interrupted streaming may ultimately damage the TV PLUS Media Center software which is NOT covered by warranty.

NOTE: ALWAYS ENSURE YOU HAVE SUFFICIENT INTERNET BANDWIDTH (SPEED) A WIRED CONNECTION IS BEST

- 10 MBS is a minimum requirement if you are using a wired connection with an ETHERNET Cable (this is the preferred method as it is always the most stable)

- 60 MBS or more may be required using Wi-Fi depending on the (A) Wireless Distance & (B) Interference such as (floors, walls, metal, concrete) in your specific Home/Environment.

NOTE: When using Wi-Fi, a proper wireless router that is optimized for Hi Gain, Increased Wi-Fi Range & Media Streaming Capabilities is required to avoid connection & wireless bandwidth issues. Be Advised that the further away you are from your router in Wi-Fi mode the more your BANDWIDTH (INTERNET SPEED) will be reduced.

TIP: An Ethernet connection provides the most direct connection to your Internet service and has no loss of speed regardless of distance therefore always provides a much better overall experience. Ethernet connections eliminate the possibility of interference and low speed issues related to poor positioning of your wireless router.

IMPORTANT: 99.9% of the support issues we receive are regarding a poor Wi-Fi connection, please contact your Internet provider for assistance regarding any streaming, buffering or connection issues, we do not have any way of assisting you with Internet!

Disclaimer - Terms & Conditions of Use

ULTRA BOXX brand & TV PLUS Media is a manufacturer, technology integrator & distributor of the ULTRA BOXX & TV PLUS "WICKED" Smart interface & Home Media Streaming Systems for which the principal purpose is of a Smart TV Accessory, Personal Computing, Gaming as well as and not limited to Media Streaming of personal & legal content for home viewing.
